

Composite & Timber Garden Workshops

All our prices include UK mainland delivery and full on-site installation by our expert installation teams.

Choose from a range of sizes and external cladding options, including Fibre Cement, Smooth, Woodgrain, ProClad Woodgrain composite wood or either Thermowood or Western Red Cedar timber. Our composite cladding materials are available in a variety of different colours. You can also mix any external claddings.

The 100mm structural timber walls and 120mm Tanelith E Treated floor sections are insulated with 75mm Knauf RS45 thermal acoustic insulation for superior warmth and soundproofing.

Our garden workshop roofs feature a highly insulated trapezoidal roof panel system, with a 120mm panel containing PIR rigid thermal insulation for maximum energy efficiency. For added protection, an exterior waterproof vapor barrier prevents moisture infiltration, keeping the pod dry, mould free and durable year-round.

Our fully insulated composite or timber clad garden workshop range provides you with a high quality garden work space solution which will last a lifetime.

We utilize high-quality, sustainable materials that not only enhance the aesthetic appeal but also guarantee long-lasting durability.

A composite or timber clad garden workshop is the perfect addition to your garden, providing a dedicated space for DIY projects, woodworking, hobbies, storage, or practical work all year round.

Inside, the walls are lined with 11mm OSB timber, a stronger alternative to plywood, perfect for garden workshop interiors. The OSB board can be left natural, stained, or painted to match your style and preferences. A fully plasterboarded and plastered interior is also available.

Each garden pod includes a 1.5m-wide PVCu French patio door and 2 x PVCu 1200mm x 500mm opening window, combining style with practicality.

Each garden workshop comes with a complete electrics package, including a consumer unit, 4 x double electrical sockets, LED light panel and a light switch.

A qualified electrician will test the internal wiring and issue a Part P electrical certificate, ensuring it's ready for connection to your home's mains supply by either your electrician or ours (if pre-arranged).
